ESCAPE THE HEAT — BERLIN MITTE

Mean modelled PET in selected green-space polygons · 14:00 · Climate analysis 2022

Mean PET at 14:00 (°C)

- 20 - 25 °C
- >25 - 30 °C
- >30 - 35 °C
- >35 - 40 °C
- >40 - 45 °C

READING THIS MAP

PET (Physiologically Equivalent Temperature) describes thermal conditions experienced by the human body. It is not air temperature.

Colours show mean modelled PET within each selected green-space polygon at 14:00.

56 polygons with at least 100 valid raster cells are shown. Labels identify polygons with at least 1,000 valid cells.

Values describe the modelled scenario, not current weather. Conditions can vary considerably within each polygon. Polygons may represent parts of parks; public access is not assessed.

SOURCES & METHOD

PET: Berlin Umweltatlas,
Klimaanalysekarten 2022, 10 m raster.

Green spaces: Geoportal Berlin,
Grünanlagenbestand, retrieved 6 Nov 2026.
Boundaries may differ from those in 2022.
